

- Recognizing unsafe materials and equipment
- Cranes
- Hoisting of Personnel
- Anchor handling
- Rules and Regulations
- Basic load calculations
- Certification, Inspection and Marking
- Safe use of materials

Certification 4 years validity

Program Week 2 – Thursday

First Aid Red Cross

For BOSIET participants, there is a possibility to combine this course by following an extra module of 8 hours e-learning and 2 hours classroom session, which results in the official Red Cross certificate. From unconsciousness to swallowing and from burning injuries to poisoning. Make sure you know what you need and practice all skills during our first aid course. Reanimation and use of the AED are also part of this course.

Duration:

8 hours online preparation and 2 hours classroom
Save time by exercising online with the theory. Knowledge tests and clear videos make this online theory anything but boring. Practical exercises will be conducted in the classroom with your colleagues

Learning objectives and subjects

To ensure the safety of a casualty to assess the condition, to alert emergency services and to provide first aid to:

- Cardiac arrest: Resuscitation and use of an Automatic External Defibrillator (AED)
- Consciousness, choking
- Burns, skin wounds, bleeding, nose bleeding
- Head injury, nerve and vertebral injury
- Poisoning
- Pain in the chest, stroke
- Bone injuries, muscles and joints

Certification 2 years validity

Program week 2 – Friday

STC-KNRM
OFFSHORE SAFETY TRAINING

**SUPPORT SERVICES
FOR SETTING UP
A SAFETY &
KNOWLEDGE TRAINING**

for White Coral Offshore Services

www.stc-knrm.nl

Why choose to train with STC-KNRM?

- Quick and easy booking
- High degree of flexibility
- Free rescheduling
- Unique indoor and outdoor facilities
- Realistic training simulations
- Professional and enthusiastic trainers
- Multiple payment methods
- Good accessibility in the center of Rotterdam

Accreditation bodies

We are fully accredited by the following bodies:

- IMO, STCW
- OPITO
- NOGEPa
- OLF
- DNV
- Bureau Veritas

STC-KNRM is able to offer specialist support in the following areas:

- TRAINING
- TRAIN THE TRAINER
- DEVELOPMENT OF TRAINING PROGRAMS
- CONSULTANCY

This is a potential concept program, together with you we can develop the most efficient and suitable programs >

Program week 1- Starting from Monday to Wednesday

The Basic Offshore Safety Introduction and Emergency Training

The BOSIET is a three-day training intended for employees working in the offshore sector. The aim of this training is to provide knowledge to offshore personnel about basic safety on platforms, survival at sea and providing (basic) first aid.

The 0.5a BOSIET + NOG- supplement is OPITO and NOGEPa approved, NOG accepted and is valid worldwide. The certificate is valid for 4 years. Within 4 years the certificate has to be refreshed by doing a 0.5b/ FOET training.

The BOSIET training includes:

- Safety induction
- Firefighting
- First aid
- Hypothermia
- Helicopter safety/ HUET + CA-EBS
- Lifeboat Theory and Practice;
- Survival Theory and Practice
- Norwegian escape Chute

Program week 1 –Thursday

H2S

This H2S is intended for persons working anywhere where hydrogen Sulphide gas can be expected or has been found. The aim of this training is to inform the delegates on the health and safety issues related to hazards and risks of hydrogen Sulphide gas and to equip them with the basic emergency response knowledge and skill.

This H2S training contents:

- Knowledge of the properties and hazards of H2S
- Knowledge of working activities on a H2S location
- Knowledge of the necessary layout on an H2S location
- Handling, use and restrictions of the specific compulsory personal protective equipment
- Handling, use and restrictions of personal detection/alarm equipment
- Escape procedures in case of an H2S alarm
- First aid in case of H2S victims
- Knowledge of H2S rules in the Working Condition Act

Certification 4 years validity

Crew basket

The Crew Basket training aims to increase the awareness of safety and become familiar with the precautions in the field of transporting personnel between ships and platforms.

This Crew basket training contents:

- Points of Attention
- Awareness of crew basket procedures
- Conditions and requirements
- Inspection before each use
- Responsibilities
- Transfers

Certification 4 years validity

Breathing apparatus

The Training Breathing Apparatus is a tailor-made training that we, in consultation with you, arrange for the training to perfectly prepare your employees for their work. The training is intended for employees who should be able to use

Program week 1 – Friday

A day off to organize a trip on which we can assist of advice and a day with free time to study the Red Cross e-learning module

Program week 2- Starting from Monday to Wednesday

Banksman / rigging & Slinging

This 3-day practical Banksman offshore training is specifically designed for operational personnel on ships and/or oil platforms involved in hoisting operations. The purpose of this Banksman training is for participants to perform hoisting operations safely, responsibly and efficiently in cooperation with the crane operator.

This training consists of a combination of theory instruction, hands-on exercises and practical exercises with the crane and other hoisting equipment. The following topics are covered:

- Materials and Equipment (among others Fibre Ropes, Fibre Slings, Wire Ropes, Slings, DNV 2.7-1 container, Shackles, Chains, Hoists and Winches, Lifting Beams and Spreader Bars, Sheave Blocks, ROV Equipment)
- Select the safest and most efficient materials and equipment
- Latest developments
