

EUROPORT 2019

5-8 Nov | Rotterdam Ahoy

SPECIAL SHIPS SMART SOLUTIONS

UPDATE #JUNE 2019

NEW CRUISE MARKET OPPORTUNITIES

ROTTERDAM MARITIME CAPITAL OF EUROPE

EUROPEAN TUGOWNERS JOIN HANDS

THE SPOTLIGHT IS ON FOR SPECIAL PURPOSE VESSELS

Strong upturn in a significant number of the sector-specific markets for which Europort is renowned suggest that stakeholders should block out November 5-8 2019 for a trip to the Ahoy Centre, Rotterdam for the only event dedicated to specialised ships.

Raymond Siliakus, Exhibition Manager, says, "Special purpose ships offer unique opportunities, but converting them demands deep market insight and the smart solutions that drive efficiency."

Europort's unique value proposition is its exhaustive coverage of a broad range of special ships, including naval vessels, offshore support crafts, fishing boats, short sea ships, cruise vessels and ferries, all of which need smart technologies and people to enable return on investment."

One sector proving robust is the superyacht market, which analyst Coherent Market Insights says will

be worth US\$35.5 billion by 2026 (2017 - \$22.5 billion). Given that Dutch shipyards and suppliers command 30% of the global market, Europort is a natural sector hub that draws worldwide clients, with exhibitors therefore understandably including design and technology innovators from Italy and Turkey.

High profile river cruising, meanwhile, is contributing strongly to growth in the inland waterways market, with cruise traffic on the Rhine growing by 128% over the period 2002-2017, according to inland association CCNR. As home to Europe's largest fleet of inland vessels, expertise

from the Netherlands will be widely on display at the Europort 2019 exhibition, with trade association Royal BLN-Schuttevaer holding its annual conference on inland shipping on November 8th.

Workboats and dredgers remain prominent at Europort. Once again, the CEDA Dredging Days events will held in conjunction with Europort, drawing all main market players to Rotterdam. Similarly, Europort is a must for tug builders and equipment suppliers, and this year shows why, as the European Tugowners Association (ETA) stages their second Autumn conference in parallel with Europort 2019 on November 7th.

"Special purpose ships offer unique opportunities, but converting them demands deep market insight and the smart solutions that drive efficiency."

SHOWCASING NEW SPECIAL CRUISE MARKET OPPORTUNITIES

With demand for the cruise vacation reaching an all-time high in 2018, trends and technologies in this globally fast-growing sector will be a natural area of focus during Europort 2019 at Rotterdam's Ahoy Centre November 5th-8th.

A recent survey by the Cruise Lines International Association (CLIA) found that global cruise guest numbers exceeded 28.5 million in 2018, 7% above 2017. But, while global trends are heavily influenced by China, demand in the Netherlands has emerged as a trend in its own right: 113,000 nationals took a cruise in 2018, 2.2% up on 2017. Over 40% of Dutch guests were under 40.

Paul Nuyens, CLIA Manager for the Netherlands, Belgium and France, comments: "The figures show that a cruise vacation is working for an increasingly wider audience, such as families with children and young people. It is not surprising that a growing number of ships are being built with this target group in mind."

Given its focus on specialized ships, it is also no surprise that Europort participants are homing in on opportunities being created by booming

expedition ship and river cruising niches, where European guest demand is especially vibrant.

Last year shipbuilder Damen formed a separate Damen Cruise entity and, by March 2019, had announced a contract for a 155m, ultra-luxury cruise ship for SeaDream Yacht Club, to be built to Polar Code 6 standards. Then, in April, A-Rosa signed a contract with Concordia Damen to build a 135m river cruise vessel. To meet Damen's cruise and river cruise specialists at Europort 2019, visit the Damen Shipyards and Concordia Damen booths.

Other Europort participants with a keen interest in this specialised cruise segment include: ABB, whose Azipod propulsors feature in over 20 expedition ship projects; Wärtsilä, which recently won orders to supply 60-plus transverse thrusters for 12 cruise ships building at six shipyards; Evac, highlighting its Evac Evolution ballast water

management system; and Bolidt, which will offer insights into its innovative cruise ship decking and flooring solutions.

In addition, one of Europort's famed Masterclass sessions this year focuses on the cruise and ferry sector. On Friday 8th November visitors can hear perspectives on challenges and solutions for the segment's continuous quest to enhance sustainability.

Europort exhibition manager, Raymond Siliakus, concludes: "Europort 2019 will provide a single location for owners and operators to engage with the full range of specialists needed to meet design, construction, technology, safety and environmental performance needs in an increasingly product-differentiated cruise market."

UNDERWATER WORKS ATTRACTIONS

A brand new option has been added to the menu at Europort, in the shape of a special 'Underwater Works Pavilion'.

The new addition provides a special area for visitors to focus on the sometimes dangerous and always challenging tasks undertaken by diving, inspection and salvage companies, plus the service providers, manufacturers, designers and materials suppliers supporting these high pressure activities.

As well as sharpening focus on the tools used for cutting, welding and other manual labour processes, Europort 2019 will also offer visitors the chance to update themselves on the drones, ROVs and digital technology that are redefining this highly-skilled sector.

The special pavilion even features its own large dive tank so that exhibitors can do product demonstrations.

To be part of the Underwater Work Pavilion at Europort 2019, contact the project team.

PASSENGER SHIPS ON A GREEN JOURNEY

The cruise and ferry sectors are at the forefront of shipping's drive towards greater sustainability. Zero emission battery power is already becoming a commercial reality, as a propulsion solution over short distances or as auxiliary power to boost ship efficiency, while the power capacity available to fuel cells using hydrogen is also on the rise.

Johan Rostin, Chief Executive of ForSea Ferries, says sustainable shipping brings commercial as well as reputational rewards.

Few shipping companies have embarked on their 'Green Journey' with more commitment than Sweden's ForSea Ferries. Since last November batteries have been powering its ferries Tycho Brahe and Aurora between Helsingborg and Helsingør, making the 20 minute crossing the first intensive operation of its kind in the world. ForSea even charges its batteries from renewable sources.

"In Scandinavia people are passionate about environmental protection," says ForSea Ferries Johan Rostin. "They want action and not just talk."

The appetite for sustainability is also a feature of the fast-growing expedition cruise market, where guests seeking to explore the remote wonders of nature prefer to do so onboard environmentally responsible ships. Sustainable technologies are central to 'smart shipping' - one of the key themes at Europort 2019. In fact, this year's event even includes a special

'Reducing the carbon footprint of ferries and cruise ships' Masterclass, scheduled for Friday 8th November. Rostin, says ForSea's 'green journey' has already passed some significant milestones, "Over the first quarter of this year our bunker fuel consumption was halved compared to Q1 2018, saving around 4,500 tons of CO2 in just three months. Our workforce also tell us they really feel the reduction in vibration levels onboard, and it is much quieter - for passengers and crew, and for residents living close to the ports."

It is a journey that can also have other welcome benefits, adds Rostin. "As we approach the busy summer months our passenger bookings are increasing. More people want to travel on our ferries simply because they are battery powered."

For more information on the Europort ferry and cruise ship Masterclass go to: <https://www.europort.nl/programme/masterclasses>

EUROPEAN TUGOWNERS JOIN HANDS WITH EUROPORT

Europort adds an important new programme partner, following the decision of the European Tugowners Association (ETA) to hold its second Autumn conference to run alongside the Rotterdam event. The special conference will take place on November 7th and its focus is in full alignment with Europort's Smart Business theme.

The event will focus on current practices in the tug sector and investigate the business models that are most likely to bring future success. The conference will also review approaches taken in other maritime sectors, to see what lessons can be learned.

The new addition consolidates Europort's position as a key show for workboats, a sector covered by the event since its inception, also strengthening an already packed programme comprising several returning conferences and events. These include CEDA Dredging Days, Europort Masterclasses,

RINA Marine Industry 4.0, MareForum and MariMatch.

For more information and how to register, please visit: www.europort.nl/programme

LAUNCHING #YOUNG EUROPORT

New generation maritime professionals are invited to join the #YoungEuroport programme at Europort 2019, to become part of a unique knowledge-sharing platform offering opportunities to network with peers and gain access to some of the leading figures in the industry.

In line with its role as a launchpad for new talent, Europort 2019's opening ceremony is scheduled to spotlight a group of Young Maritime Representatives, while the exhibition floor will host many initiatives, amongst others:

- Students on stage
- CAREER4SEA - EUROPORT New Generation Award
- milestone in shipping or acting as a role model to attract new talent into the industry

- 'The future generation of shipping' seminar, organised by YoungShip Rotterdam
- Mainport Talent Dinner where CEO's will cook for young professionals
- University innovations
- CareerLab, developed by Talentium
- Launch of Shipathon 2020 - Smartening seagoing vessels
- Job Route and networking by Navigo

EUROPORT PARTNERS SAFETY4SEA AWARDS

Europort has entered into partnership with SAFETY4SEA to stage a series of special awards to acknowledge and celebrate the innovators offering the routes to digital shipping, better environmental protection, enhanced safety at sea and fulfilling maritime careers. Industry excellence will be recognized through 20 awards presented at events to be held on each of the exhibition days, with five awards falling under four thematic categories.

Apostolas Belokas, Managing Editor, SAFETY4SEA, commented: "We are very excited to announce this new collaboration with Europort, one of the world's leading maritime events, with the inaugural SAFETY4SEA - EUROPORT Awards. We look forward to celebrating distinguished efforts by industry stakeholders and the significant contributions being made toward a safer, smarter, greener and more sustainable shipping industry in this key meeting place."

The process includes a combination of open nominations and voting, and provides an opportunity to acknowledge the good work of all nominees. At the end of the awards presentations,

there will also be a panel discussion featuring all winners. The awards are open to organisations and individuals participating in Europort as exhibitors or partners, or those based in or operating with an office in Belgium, Denmark, Finland, France, Germany, Netherlands, Norway, Sweden or United Kingdom.

Online nomination open

The deadline for online nominations for all award categories is Friday June 14th, with the shortlist announced on June 20th. Then, online voting will be available up to Monday September 30th at <https://europort.safety4sea.com/> where participants can cast their votes.

SAFETY4SEA EUROPORT Awards

- SMART4SEA – EUROPORT Awards ceremony, November 5th, covering e-navigation, cyber security, initiative, technology and ship operator;
- GREEN4SEA – EUROPORT Awards, November 6th, covering energy efficiency, clean shipping, initiative, technology and ship operator;
- SAFETY4SEA – EUROPORT Awards, November 7th, covering sustainability, training, initiative, technology and ship operator;
- CAREER4SEA – EUROPORT Awards is November 8th, covering education, investment in shipping, initiative, women in shipping and the new generation.

EXHIBITION PROGRAMME

Europort 2019 offers an exceptionally in-depth programme. A series of conferences and masterclasses will allow know-how and expertise to be shared in a highly efficient manner. Industry-wide achievements will be recognised by award presentations and your network will be enhanced by matchmaking events. There will be much to learn and many people to meet during the Europort week.

CONFERENCES

- Marine Industry 4.0 Conference
- Mare Forum Ship Finance conference
- European Tugowners Conference
- CEDA Dredging Days
- BLN Inland Shipping Conference

MATCHMAKING

- MariMatch Europort
- KvK Business Challenge

MASTERCLASSES

- Naval innovations as source of inspiration
- Maritime solutions for offshore renewable energy
- Optimizing efficiency of short sea operations
- Reducing the carbon footprint of ferries and cruise ships

YOUNG EUROPORT

- CareerLab
- Mainport Talent Dinner
- Seminar "The future generation of shipping"
- University innovations
- Launch of Shipathon 2020
- Smartening seagoing vessels
- Job Route

AWARDS

- SMART4SEA EUROPORT Awards
- GREEN4SEA EUROPORT Awards
- SAFETY4SEA EUROPORT Awards
- CAREER4SEA EUROPORT Awards

NETWORKING

- Europort Cruise Party
- Exhibitors On Stage
- Start Up Plaza
- Underwater Works pavilion

EXHIBITION SPACE SELLING FAST

The enduring popularity of the Europort exhibition is underlined by the fact that with five months still to go before doors open, 90% of the available space is sold out.

The enduring popularity of the Europort exhibition is underlined by the fact that with six months still to go before doors open, 90% of the available space is sold out. Confirmed bookings include many leading industry players, as well as numerous national pavilions for countries around the globe. A detailed floor plan is available on the website,

www.europort.nl, identifying the locations still available. If you want to participate, though, time is running out fast.

Please contact the Europort project team for details of the space and stand options that remain.

VISIT EUROPORT 2019 FOR FREE!

You are invited to visit Europort between 5 - 8 November, at Rotterdam Ahoy, free of charge.

After completing your registration you will receive an email with your digital ticket for a free visit to Europort 2019. When scanning your digital ticket at the entrance of the exhibition you will receive your personalised visitor badge. We look forward to welcoming you to Europort 2019. To register, please see: <https://www.europort.nl/visitor/registration>

EUROPORT CRUISE PARTY

Another returning event of this year's programme is the Europort Cruise Party which takes place after the exhibition closes on the evening of Wednesday November 6th.

The occasion is held in the delightful setting of the elegantly renovated SS Rotterdam and is an ideal opportunity to invite potential new business contacts or meet old industry friends while enjoying good food and drink in a unique location overlooking the river Maas and Rotterdam skyline.

This year, in line with #YoungEuroport, the gathering will be made even more lively by the 'Talent Dinner', which challenges a hand-picked group of CEOs from the maritime industry to cook for – as well as engage with – some of the young professionals onboard. It will certainly be interesting to see how industry leaders acquit themselves when it comes to satisfying the gastronomic needs of the next maritime generation!

Shuttle buses will be available after the exhibition closes to transfer visitors and exhibitors to what is sure to be a most enjoyable evening. More information and tickets via: <https://europortcruiseparty.nl/>

ROTTERDAM. MARITIME CAPITAL OF EUROPE.

A WARM WELCOME TO ROTTERDAM MARITIME CAPITAL OF EUROPE

Rotterdam, the maritime capital of Europe, is rolling out the red carpet for international visitors and exhibitors at Europort.

The city's Mayor, Ahmed Aboutaleb, says: "It gives me great pleasure to welcome all participants, inviting them to see for themselves what a dynamic, cosmopolitan and business-friendly place Rotterdam is. We are very proud of our innovative, smart port with its high-quality infrastructural connections and the flourishing maritime industry it supports." The city has always exerted a powerful attraction for maritime pioneers and market

leaders up to this present day. As well as being Europe's biggest port, Rotterdam and its region is home to many prominent companies in the fields of logistics, maritime services, offshore technology, shipbuilding and repair, among others. There are around 4,375 maritime companies in Rotterdam, employing over 180,000 people and adding around €20 billion a year of economic value to the Dutch economy.

Aboutaleb adds: "Drawing on centuries of experience and tradition in shipping and trade, today's Rotterdam is a vibrant hub, characterized by innovation and creativity. An excellent breeding ground for leading maritime businesses from all over the world."

For more information about Rotterdam, the city and its maritime industry, visit:

<https://rotterdammaritimecapital.com>

TRAVEL TO ROTTERDAM

2h37 min. Thalys **Rotterdam – Paris**

27 min. Intercity Direct **Rotterdam – Amsterdam**

Free hotel shuttle service

45 min. **Rotterdam – Schiphol** Amsterdam Airport

40 destinations **Rotterdam – The Hague Airport**

HOTEL BOOKING & SHUTTLE SERVICE

Europort has secured a large number of hotel rooms at preferential rates for both exhibitors and visitors, through Preferred Hotel Reservations. To

take advantage of this hotel booking service visit <https://www.europort.nl/visitor/how-to-get-to-ahoy> During Europort a daily shuttle service will be

available from a wide range of hotels in Rotterdam. Shuttle busses will bring visitors from their hotels to Rotterdam Ahoy and vice versa.
